

HARSHIT VERMA

Full Stack Web Developer | Building Modern, Fast & Secure Websites

Greater Noida, India • codebreaker2603@gmail.com • +91 9990066256

ABOUT ME

I am a results-driven Full Stack Web Developer with over 5 years of experience designing, developing, and deploying modern, responsive, and secure websites for businesses and professionals worldwide. I specialize in crafting visually stunning user interfaces while maintaining highly optimized, secure backend databases and APIs. My goal is to translate your complex business ideas into beautiful, scalable, high-performing digital realities.

PROFESSIONAL EXPERIENCE

Freelance Full Stack Web Developer | Independent Practice

Tenure: 5+ Years (Active Practice)

- Architecting robust full-stack web applications from ideation, UI design, backend logic, and database design, through to deployment.
- Developing highly-responsive and modern client-side user interfaces utilizing CSS frameworks such as Tailwind CSS.
- Engineering secure backend ecosystems leveraging Node.js and Express.js, featuring secure token-based authentication (JWT) and bot defenses.
- Setting up custom database schemes on MongoDB and SQL databases tailored to clients' specific performance metrics.
- Providing ongoing monthly site reliability updates, server-side maintenance, bug-fixes, and optimization protocols.

FEATURED PROJECTS

1. VOID Gaming Café Website

Category: Premium Business Website | Live Demo: coidcafe.vercel.app

Designed and developed a premium high-end immersive dark-themed site showcasing the café's gaming setups, pricing tiers, VIP memberships, and real-time customer support details. Features smooth scroll animations and robust responsive controls across all platforms.

Technologies: HTML5, Tailwind CSS, JavaScript (ES6+)

2. Law Firm Web Platform

Category: Professional Legal Services | Live Demo: lawfirm-nine-ashy.vercel.app

Architected a minimal, modern, highly clean landing page structure for legal consultation. Features custom, heavily validated contact forms protected against bot submissions to protect client data integrity, built with a secure node backend and blazing fast client-side performance.

Technologies: HTML5, CSS3, JavaScript, Node.js, Express, Bot Shield Validation API

SERVICES PROVIDED

- Website Design & Creative Wireframing
- Full-Stack Web Development & Maintenance
- High-Converting Landing Pages & Personal Portfolios
- Express Backend Systems & MongoDB Database Architecting
